

Introduction to Computing

Graded Lab 1

Q1: Write a C++ program that creates a calculator using four operators ('+', '-', '*', '/').

NOTE: Using if/else statements.

Sample Output:

```
Enter operator: +, -, *, /: *
Enter two operands
8
2
8 * 2 = 16
-----
Process exited with return value 0
Press any key to continue . . .
```

```
Enter operator: +, -, *, /: &
Enter two operands
12
3
Wrong Operator!
-----
Process exited with return value 0
Press any key to continue . . .
```
